A maximum of 9 children is recommended for this swing

Safe Play Area:

- The safe play area refers to a zone extending 6' beyond the gym set on all sides, including the space above the gym set.
- The ground surface must be level. Installing your gym set on sloping ground can cause it to lean or "rack". This leaning puts additional stress on all connections and joints and in time will cause those connections to loosen and fail.
- The safe play area must be free of all structures, landscaping, trees and branches, rocks, wires, and other obstacles to safe play. Children can be seriously injured running or swinging into these obstacles.
- Remove all tripping hazards from the safe play area. Tripping hazards include: roots, stumps, rocks, landscaping, sprinkler heads, railroad ties, plumbing and electrical connections.
