

60431 Tic-Tac-Toe Assembly Instructions

The Tic Tac Toe play kit is a fun play activity for your children. This item comes complete with sturdy mounting and body components for rugged durability. Use as an additional play activity or for replacement of your original equipment. The metal support rods can be cut to adjust the height to fit an opening in a range from 17" to 22". Comes complete with all needed hardware, plastic Tic Tac Toe cylinders and colorful decals.

A Begin by putting together the threaded rods. Tighten them securely.

Depending on the size of the opening where you intend to install the Tic Tac Toe, you may need to use a hacksaw to cut the rods. Try the fit before you cut.

Insert the three rods into one of the green plastic mounting brackets. This will be the bottom mounting bracket.

B Thread a blue washer on a rod.

If you wish to make sure the spacing of the playing pieces is maintained, you may drill 1/8" pilot holes into the rod, using the hole in the washer as a guide. Secure the washer to the rod with a 1/2" screw provided.

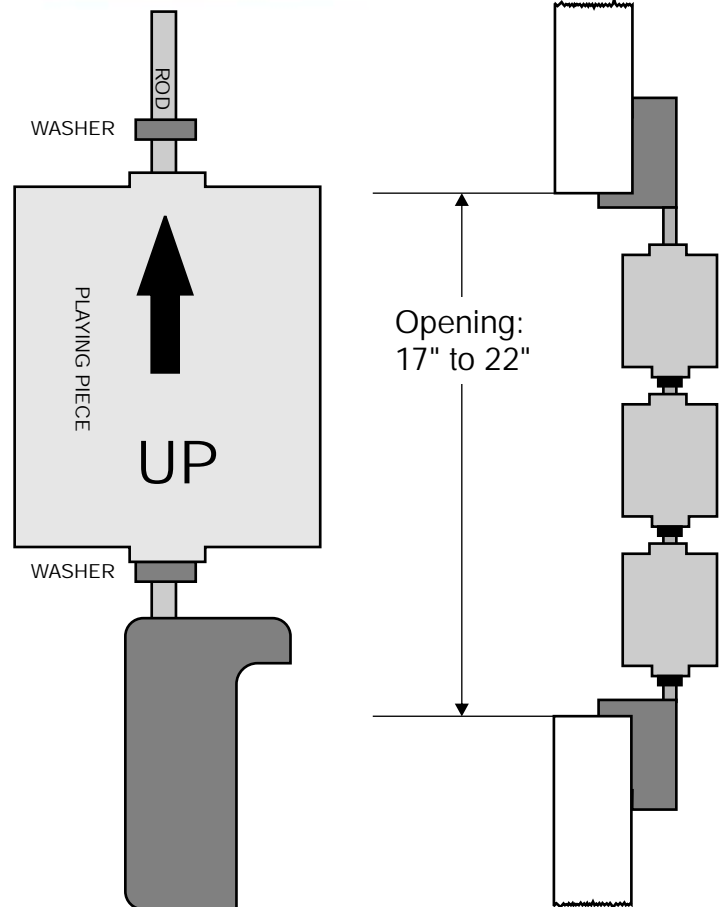

C Thread on one of the yellow playing pieces, pushing it against the washer you just installed.

D Continue threading washers and playing pieces on the rods in that fashion until you have all nine playing pieces and washers threaded onto the three rods.

E Slide the last green plastic mounting bracket onto the rods and push together until the rods are completely seated.

It's easier to put all the decals on the playing pieces before you begin assembly. Each playing piece will get three decals, one each, X, O and Monkey.

F Attach the assembled Tic Tac Toe Kit to the playset using the six wood screws provided.
